

TRUST IS YOUR AI'S MISSING LAYER

Digital Campaign for CTOs & CIOs

Presented by Bytes

PROBLEM

Speed vs. Trust

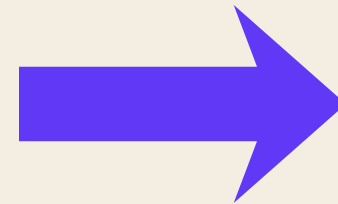

- Companies race to ship AI features but lack guardrails.
- 74% of projects fail compliance review after deployment

Pressure

- **CTOs & CIOs** are under pressure from leadership and are responsible for AI compliance failure

IMPACT

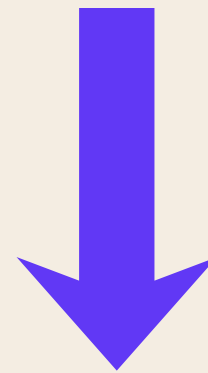

CTOs/CIOs are
deploying AI faster
than they can trust or
control it

- Lawsuits
- Money loss
- Reputation damage

SOLUTION

Inhibitor = Trust Layer

Detects risks

Understand AI concepts

Stay compliant

CAMPAIGN CONCEPT

“Trust Is Your AI’s Missing Layer”

This is a *digital-first awareness campaign* designed to:

- Educate CTOs/CIOs about hidden AI risks
- Make AI risk feel **urgent** and **real**
- Guide them to a **solution** → Inhibitor

EFFECTIVE OUTREACH

LinkedIn Ad captures attention

Landing page builds understanding of campaign

AI Trust Score tool creates engagement and realization

Email follow-up enforces to book demo

CAMPAIGN DELIVERABLE

Inhibitor AI (Company Page)
Sponsored

78% of AI leaders don't fully trust their own systems.

But they're deploying them anyway.

Let that sink in.

Right now, your AI could be:

- generating incorrect outputs
- making biased decisions
- exposing your company to compliance risk

And you might not even know it.

The problem isn't AI adoption anymore.

👉 It's AI trust.

We built a way to measure it.

In 60 seconds, you can see your AI's trust score—and where the risks are.

Can you trust your AI?
